Education

Maharaja Agrasen Institute Of Technology   **2021 - 2025**
B.Tech in Electrical & Electronics Engineering   CGPA: 8.75/10.0

Technical Skills

Languages: Python, C/C++, JavaScript

Technologies/Frameworks/Tools: React JS, Node JS, HTML, CSS, Git, Cloudflare, SQL, MongoDB, Drizzle

Data Structures and Algorithms, Object-Oriented Programming, Database Management.

Projects

Study Buddy : Practical Exam Prep Platform   Live

- A web-based platform with the EEE department to centralize practical exam resources, improving student access to subject outlines, viva questions, and supplementary materials.
- Designed using HTML, CSS, with JavaScript, enhancing efficiency by 85% for students preparing for practical exams.
- JWT authentication for secure, role-based user access, ensuring authorized access to resources.

SyncSheet : Cloud-based Google Sheets API   Source Code

- Built a cloud-based service that automated **Google Sheets** insertions, increasing operational **efficiency by 40%.**
- Able to handel over 100,000 insertion requests, **reducing response times by 50%** during high-volume events.
- Integrated support for **CloudFlare Workers via Wrangler**, streamlining JavaScript execution in server less environments.

Vines & Co : Animated Wine Selection Experience   Live

- A visually appealing website theme with **GSAP and Locomotive Scroll** animations, enhancing the presentation of wines and boosting user engagement.
- Streamlined the wine selection process by creating an intuitive, user-friendly interface, **reducing navigation time by 45%** and enhancing user experience.

Aero Expert : Flight Management System   Source Code

- A robust flight booking system in C++, improving flight management efficiency and resulting in faster booking processes and enhanced user satisfaction.
- **NoSQL** integration for reliable data storage and **OpenCV** for seamless photo and document uploads, boosting versatility and speed by 70%.

Experience

ANS Worldwide | Uttar Pradesh | Front-End Developer & Designer   5/2024 - 08/2024

- Improved software and web interfaces for **ANS subsidiaries**, reducing clutter by 30% and making navigation easier.
- Built features with **React.js** and **Tailwind CSS**, ensuring smooth performance across different devices.
- Tracked tasks in **JIRA** using **Scrum**, keeping updates aligned with business needs and delivered on time.
- Worked with core software technologies like **Qt and Win Forms**, for efficient UI and functionality.

Achievements

- **CodeForces – Specialist (@ 1418)** with a Global max rank of **336 in Codeforces Div-3**.
- **LeetCode** - Ranked in the **top 8% globally with a 1830+ (Knight) rating**.
- **Flipkart GRiD 5.0 - Cleared Round 1 (Rank - 3445)** and **Qualified for Round 2** among **210,762** learners across the nation.

Certifications

GOOGLE CLOUD LABS - Introduction to generative AI   **SCALER** - Data structures in C++
GREAT LEARNING - Project Management With JIRA   **NPTEL** – Programming in Modern C++
ACCENTURE - Software Development Fundamentals(simulation)
